

Introducing businessvoice

iinet
connect better

At iiNet we mean **business**

At iiNet, we've been talking to a lot of small businesses like yours, and we think you shouldn't have to be big to experience big business technology. That's why we created Business Voice, our new state of the phone package that lets you focus on what you do best.

Business Voice identifies the different needs of your organisation and offers a handset to suit. Each handset is designed to improve performance, efficiency and professionalism.

Local and national calls, handset rental and line rental are all included for an affordable monthly cost. Each handset is packed full of features including call forward, auto receptionist, voicemail to email and conference calling facilities.

Business Voice is also scalable, meaning it grows as you grow. Assigning new handsets is just a quick phone call away, and the whole package is backed by our award winning 24/7 business support.

We are confident that Business Voice will not only service all your business needs, it will save you money on your existing phone bill.

5 Reasons

1. Reduce your phone bill

Business is always evolving. Ideally you'd be able to secure the most advanced technologies without having to spend significant amounts of money upfront on hardware. Business voice makes this possible. With Business Voice you save from day one on your monthly fees with included local and national calls.

4. Easy Installation & management

We know you're busy. So we've made installation simple. Business Voice is hosted on our own secure servers with easy access through an online management tool, and it's as simple as plugging into your computer to begin.

2. Scalable with business growth

Five year projections? Frankly, for most businesses, it has become nearly impossible to make accurate predictions. It's why you need a highly flexible technology like iiNet Business Voice. It's simple and quick to add more phones or even hook up a new branch.

5. Premium Handset & HD Voice

Business Voice gives you the opportunity to replace your old phone system for a state of the art solution at a fraction of the cost. Our handsets are among the best in the world, offering HD voice and easy to use digital displays.

3. Feature rich solution

Business Voice offers HD Voice, music on hold, conference calling facilities, call forward to mobile, voicemail to email and a host of features that will simply make business that little bit easier.

HDvoice

line rental & handset included

24 month contract term

Free Setup

All plans include local & national calls. Calls to mobile 15c/min. International calls from 5c/min. No flag fall.
